Part 1: News and Infos

1. Radar Iran back on 28960 kHz

Due to Sporadic-E we found the Iranian radar again on 28960 kHz on FMOP with 150 and 313 sweeps/sec and about 50 kHz wide. The German PTT BNetzA in Konstanz was informed.

Screenshot: DK2OM on May 30th – You can see the alternating blocks and the gap between the blocks.

28960 kHz

soundfile: <http://www.iarums-r1.org/iarums/sound/28960-irn1.wav>

Measuring the sweeprate by W-Code FFT-display: The difference between the peaks shows the sweeprate. In this case 313 Hz = 313 sweeps/sec - Screenshot: DK2OM on May 30th.

2. 14280 kHz Russian OTH radar Contayner

The Russian OTH radar Contayner appeared on 14280 with 50 sps and 13 kHz wide with S9 + 60 dB on May 12th !

3. 7051 kHz Russian F1B disappeared

The German PTT Konstanz sent an official complaint. Many thanks for help to the BNetzA Konstanz.

4. Chinese radars again – never ending story

Chinese OTH radars were active daily on 14 and 21 MHz on burst mode and FMOP with 50, 66.66 and 83 sweeps/sec. Please observe ma table.

5. Chinese jammer on 7200

The Chinese BC jammer on 7200 is audible in Europe every evening. Screenshot: DK2OM

6. Situation on 28 MHz

Caused by Sporadic-E we found again many fishery buoys, Russian taxi traffic on F3E (FM), Brazilian pirates on A3E (AM) and CB-like traffic from Spain and Italy on AM. Many thanks to DJ7KG for searching the fishery buoys and creating the monthly tables! <http://www.iarums-r1.org/iarums/buoys.pdf>

7. Mysterious beacon “D” from Far East Russia

The beacon “D” was audible on A1A (CW) in the evening hours on 7039.3 kHz. Spurious transmissions were logged on 7078.6, 7117.9 and 7157.2 kHz and also out of the band.
